Specialist Furniture for Schools

## Cubicle Systems

Our school toilet cubicles are specifically designed to be attractive and robust. Bolt through metal fittings are used to provide maximum strength.

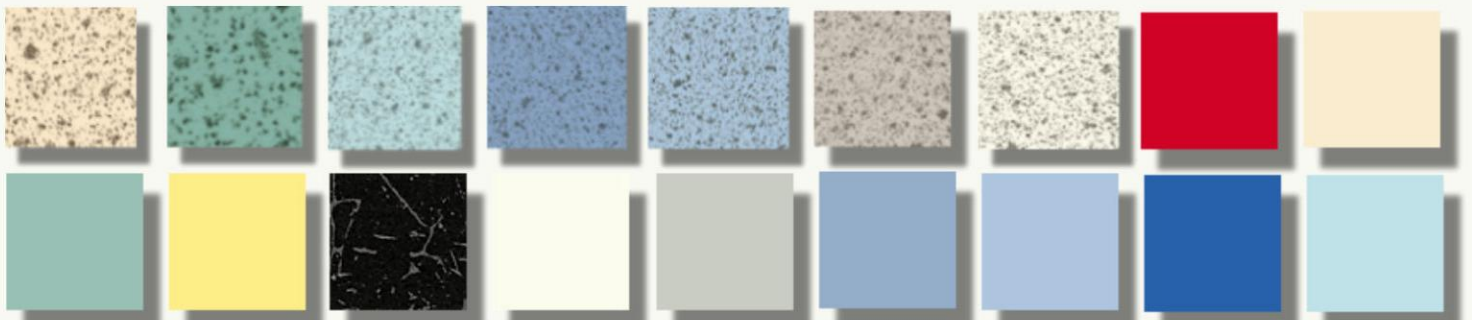

## Design and Install

Our designers will discuss all the options available to you and will be able to provide costings for your preferred layouts. Our specialist fitters can then complete the installation exactly to the design specification.

## Materials and Colours

All panels are made using scratch, wear and water resistant 13mm "solid grade laminate". Panels come in a variety of speckled and plain colours to achieve many variations.
